

INTERNATIONAL SYMPOSIUM ON FORAMINIFERA
University of Concepcion, Chile
19-24 January 2014

SESSION N° 1

SESSION TITLE	CONVENORS
<p>New classification of Foraminifera - bridging molecules and morphology</p>	<ul style="list-style-type: none"> • Jan Pawlowski University of Geneva, Switzerland • Maria Holzmann University of Geneva, Switzerland • Jaroslaw Tyska Polish Academy of Sciences, Poland
<p>SUMMARY</p> <p>The goal of this session will be the presentation of recent advances in molecular systematics of foraminifera, in relation to their phylogenetic position and classification. We are particularly interested in those studies that use molecular and/or morphological data in order to revise the taxonomy of modern foraminifera. We also invite talks on foraminiferal morphogenesis and its evolutionary consequences. In the session we will discuss the current foraminiferal classification, and propose some ideas how to revise it.</p> <p>The Paul Brönnimann Foundation will sponsor this session and will give a price for the best Student Presentation in relation with the session topic.</p>
